

# Kennismatrix

De score wordt bepaald door het aantal keren dat een technologie gebruikt werd in een project op te tellen bij het jaar waarin dat gebeurde.

| Category          | Skill                                   | Times used | Last used | Score | Rel.  |
|-------------------|---|------------|-----------|-------|-------|
| .NET              | C#                                      | 20         | 2019      | 39    | ****  |
| .NET              | VB                                      | 30         | 2019      | 49    | ***** |
| .NET              | Windows / console apps                  | 8          | 2019      | 27    | **    |
| .NET              | WPF / XAML                              | 2          | 2017      | 19    | *     |
| Appservers        | Azure                                   | 1          | 2014      | 15    | *     |
| Build support     | Confluence                              | 2          | 2019      | 21    | *     |
| Build support     | Team Foundation Server (TFS)            | 4          | 2016      | 20    | *     |
| Build support     | MS Web Deploy                           | 6          | 2019      | 25    | **    |
| Business process  | Orbis TaskCentre                        | 2          | 2019      | 21    | *     |
